GETTING LIQUIDS INTO SHAPE

# Your vision is our target

Living your visions

*“The best way  
to predict  
the future is  
to shape it  
yourself.”*

All over the world, medical people and scientists are researching into new ways and means of enhancing the well-being of humankind in every respect.

SPM is contributing to the acceleration of this project with its innovative and reliable filtration plant for the chemicals, pharmaceutical and biotechnology industries. It is not for nothing that, over a period of more than 25 years now, we have always put people at the centre of all our research work and activities.

There are always new challenges to be met, and many tasks to be taken in hand. We provide the yardsticks.

Our course is set towards the future.

SPM has consistently continued to build on its strengths and has played a decisive role in developing Innovations in processing, filtration and packaging  
Our entry into biotechnology has been a milestone on a long road, facing us with new challenges and thus leading us on to one new development or solution after another.

Today, SPM is known all over the world for its individual and tailor-made process, filtration plant and packaging for the manufacture of free-flowing chemicals, pharmaceutical and biotechnology products – plant that demonstrates innovative power and great competence in process Technology.

Our aim is to develop high-performance and economic process and filtration plant and to put it into operation in collaboration and partnership with our customers.

We want our customers to use our ground-breaking solutions to manufacture even better products in future

A close-up photograph showing a thick, clear, green gel being poured from a whole aloe vera leaf into a clear glass funnel. The gel is dripping down the sides of the funnel, and a thin stream is falling from the bottom. The background is plain white.

**Complete process plant** of modular design and also process units and skids can be assembled, tested and qualified in our own production facilities. We perform tests and trial runs with appropriate media to demonstrate the functionality of all components and apparatus before the plant is delivered.

*Good Solutions for Everything*

## SPM'S RANGE OF SERVICES:

- PRODUCTION OF PROCESS PLANT
- FILTRATION UNIT
- REACTOR VESSEL
- LIQUID PACKAGING SOLUTION
  
- TRAINING
- SERVICING AND MAINTENANCE
- RECALIBRATION
