

TWO HEAD SEMI-AUTOMATIC VOLUMETRIC LIQUID FILLING MACHINE

Key Features

- The unit is built on strong structural frame for rigidity and provides vibration free movement of operation.
- All contact parts are made of stainless steel 304/316, Teflon or HDPE.
- No breakage of containers in the event centering is not done Correctly as nozzles holder is spring loaded.
- Specially honed, wide range of selection of syringes available, This gives performance of uniform volume for a long time
- The unit can be quickly dismantled for maintenance just by opening front cover.
- Each and every part can be attached for cleaning operation or maintenance without any hindrance.
- The stroke of nozzle holder and the height of the nozzles are adjustable for achieving smooth entry and exit of nozzles inside the neck of the containers and avoid splash/ spillage of liquid or dripping at sides.

⁴ May require changes, depending on the fill temperature.

Specifications

Dimensions:

Height : 25" (635 mm)

Length: 17" (430 mm)

Depth : 14" (335 mm)

Weight:

Approx. 160 lbs. (72.57 kg)

Filling Speed:

26 CPM¹

Fill Size:

2oz - 5L

Viscosity Range:

up to 2000 cps (Centipoise)

Foamy Product:

Yes

Corrosive Product:

Yes³

Heated Product:

Yes⁴

Particulates:

No
